Notes to Editors

The original Faringdon Breakfast Club was founded in 2004. The group was threatened with closure in 2007 when SEEDA funding was withdrawn from the Faringdon Enterprise Gateway. Although the venue was still available, Gateway staff had provided the buffet breakfast. To ensure the continuity of the successful networking group, members undertook the catering themselves. Today, a local outside catering company provides a buffet breakfast.

FBBC rebranded itself earlier this year. The new-look FBBC was officially launched in May with a special Mayday breakfast which featured Maypole speed networking.
